Strong academics Dock offers advanced, honors, and AP courses that will challenge you and make it more likely for you to get into the college of your choice. Our graduates continually tell us how well-prepared they were for college work.

Dedicated teachers You will learn the facts, figures and formulas you need, but more importantly, you will learn how to *think*. Because our teachers go the extra mile to help, you will learn and achieve more than you thought possible here.

Amazing opportunities Robotics. Drama. Music. Art. Science. Athletics. Service.

Dock offers you opportunities to participate, succeed, and have fun in these and other areas that you seldom find at larger schools. Dock grads say their experiences in athletics, drama, music and art are some of their best memories of high school. At Dock you can excel in something you love to do—or discover a passion for something completely new.
