

Taylor Built Homes

Taylor Built Homes is a land developer and home builder locally managed and operated. We build within our own communities as well as scattered lots. Our company was started in September 2016 but our experience building in the St. George market exceeds a decade. Though we have great relationships with our competition and believe the other home builders deliver wonderful products, Taylor Built Homes offers an alternative to other builders in the Washington County market. We have a special emphasis on master-planned communities, nightly rental projects, bulk and individual lot sales to any builder, and building beautiful long-lasting homes that exceed the buyer's expectations. Please come stop by our office and our Bella Sol and Steeplechase communities. Our offices are located at 491 N. Bluff Street, Ste 305, St. George, UT.
