

Civil Science Infrastructure, Inc.

Civil Science Infrastructure, Inc. is a civil engineering firm which has provided consulting engineering services in Utah for over 39 years. In 2016, Brandee Walker and Travis Sanders joined the Civil Science team expanding our services to better serve our private development and municipal clients with their infrastructure and land development needs. Brandee offers over 15 years of land planning and development experience in the Southern Utah area. We offer the services of professional engineers, land surveyors, designers, and construction managers. Civil Science offers a great understanding of entitlement, land planning, utility design, lot survey, drainage and grading solutions. every type of project.
