

# Desert Mist

Desert Mist works with their clients to create their own unique ecosystem ponds, pond-less waterfalls, fountainscapes, and custom dual filtered high pressure misting system applications.

A licensed general contractor since 2005 and also certified as an aquascape contractor, our combined 40 years' experience ensures our customers a professional and enjoyable experience from design to completion and annual maintenance.

Our passion is to make every client's outdoor space a distinctive, peaceful, and beautiful oasis in the desert. Stop by the Home and Yard Pottery Shop, 592 N. Bluff Street, to see one of our ecosystem ponds and misting systems in action!
