

State Bank of Southern Utah

State Bank of Southern Utah was founded in 1957 by community leaders who saw a need for a bank to service their local financial needs. The ability to make local decisions on loans and financial services has always been at the center of the bank's culture and business model. Today, State Bank has 13 locations in 10 different cities and towns that service customers with personal banking, consumer loans, commercial loans, construction loans and more. Although solid growth has been enjoyed over the years, the same spirit of helping other people achieve their financial dreams is still important to State Bank.
